

Blue Grama

Bouteloua gracilis

Characteristics

Mature Height (inches)	10—20 inches
Cool / Warm Season:	Warm
Growth Habit:	Bunch
Introduced / Native:	Native
Seeds Per Pound:	725,000
Seeding Rate (PLS #/Ac)	3—5
Germination (days):	7—10
Soil Types:	Mesic to Dry
% of Mixture	5—75%
Drought Tolerance:	High
pH	6.5—8.3
Feed Quality:	Good

Blue Grama is a lower growing warm season perennial that has exceptional drought tolerance. Blue Grama can be used in low maintenance landscaping and turf applications as well as in any native grass mixture. Blue Grama works well as a monostand or in a mix to control erosion along roadsides and conservation areas.
