

Contains: Purple Top Turnips, Dwarf Essex Rape, Ladino Clover, Aberavon Sweet Perennial Ryegrass, New Zealand White Clover and Buckwheat

Characteristics

- Season long high protein forage
- Excellent palatability keep the deer coming back to forage
- Specialty clovers grow the big racks
- Needs to be reseeded every year

Seeding Information and Rates

Plant in the spring (best) or early fall
20 Lb bag covers 1 acre

Uses

The ultimate in deer food plot mixtures. It provides deer and other wildlife an excellent source of forage throughout the year. The Dwarf Essex Rape remains green and palatable throughout the fall, while the Purple Top Turnip provides a source of food into the winter months. The High Sugar Sweet Perennial Ryegrass is a high protein tetraploid perennial ryegrass that provides excellent high protein “candy like” forage. Of course, the Ladino and White Clover provides the proper nutrients to grow the gigantic “racks” on the bucks. The deer will actually keep the forage eaten into the ground minimizing any chance of spring re-growth. The mixture will need to be reseeded every year preferably in mid April.
