

City – County – NRD Rural Mixture

Contains: [Bromegrass](#), Oats, Perennial Ryegrass and Tall Fescue

Uses

This mixture meets the specification for Douglas and Sarpy County road mixtures as well as NRD rural seeding mixtures. This popular mixture can be used extensively in rural areas to provide excellent ground cover and erosion control. The sod forming qualities of Bromegrass blends very well with the deep-rooting Tall Fescue and Perennial Ryegrass. Oats are added as a nurse crop to aid in the establishment of the grasses and provide quick growth for erosion control.

Seeding Rate: 100 Lbs per acre (drilled), 150 Lbs per acre (broadcast)

Seeding Dates: March – May, August – October Dormant Seed: December - March

Germination: 5-14 Days (as a mix)
