Cornflower	Lemon Mint	Spiked Gayfeather
Dames Rocket	Mexican Red Hat	Thickspike Gayfeather
Dwarf Red Coreopsis	Missouri Primrose	Upright Prairie Coneflower
False Sunflower	Partridge Pea	White Yarrow
Greyhead Prairie Coneflower	Perennial Lupine	

Seeding Information

Seeding Rate: 16-32 Lbs per Acre (1/2 to 1 Lb/1,350 Sq. Ft.)
Seeding Dates: April – June Dormant Seed: December – March
Germination Times: Will vary greatly, 7 – 28 Days as a mix.

Uses

Low Grow Grow Grass/Native Wildflower Mixture is the perfect combination of grasses and wildflowers that provide the beauty of the wildflowers accented by the aesthetics of the low growing prairie type grasses. Weed encroachment is the primary problem with wildflowers. The grasses are added to maintain an adequate environment for the wildflowers to grow and flourish and not be crowded out by unwanted weeds and grasses.

Cultural Practices

Prepare a good firm seedbed and seed with a grassland type drill. It is very important that the seed be placed at the proper depth to encourage quick germination and emergence. Seeding time should be the first two weeks of May or when the soil temperature is warm enough to germinate the warm season grasses.
