

## United FACW Wetland Mixture (Wet Soils)

United FACW Wetland Mixture is formulated to more accurately represent species in Zone 3 (Iowa) and Zone 5 (Nebraska) as designated by the [USDA Wetland Indicator Status](#). FACW wetland species are found in wet soils that will occasionally dry out. United FACW Wetland Mixture is a complete mixture of native warm season grasses, native cool season grasses, wildflowers and sedges. Special emphasis of specie selection was placed on seed count per pound to minimize domination of smaller sized seeds.

**Seeding Rate:** 15.0 Pounds Per Acre (Drill Seeding)      18.0 Pounds Per Acre (Broadcast Seed or Dormant Seed)  
**Seeding Dates:** March-June      **Dormant Seed:** Mid November-March  
**Germination Times:** 10-30 Days (as a mix)
