

Prairie Cordgrass

Spartina pectinata

Characteristics

Mature Height (inches)	48—72 inches
Cool / Warm Season:	Warm
Growth Habit:	Sod Forming
Introduced / Native:	Native
Seeds Per Pound:	106,000
Seeding Rate (PLS #/Ac)	7—8
Germination (days):	14—28
Soil Types:	Wet to Mesic
% of Mixture	5—25%
Drought Tolerance:	Low
pH	6.0—8.0
Feed Quality:	Good

Prairie Cordgrass is found in moist soils along shorelines and in wetland areas. This warm season aggressive perennial can reach mature heights of up to 7 feet, and will provide excellent cover and food for wildlife. Prairie Cordgrass is not tolerant to drought periods, has no salt tolerance and prefers full sun exposure.
