Uses

A mixture of the very best of the new lower growing (dwarf) turf type tall fescues. Varieties selected score at the very top in the NTEP trials for turf quality, wear tolerance, low maintenance performance, leaf texture, endophyte enhancement and disease resistance, especially brown patch. Blue Chip and Everest Kentucky Bluegrasses are special type bluegrasses, which provides the knitting effect of the Kentucky Bluegrass rhizomes but are non-aggressive and will not compete with the tall fescue. Can be used in all aspects of the turf industry. Generally recommended for areas where supplemental irrigation can be applied, however, will adapt well to low maintenance areas.
