

SUPER TURF II

Turf Type Tall Fescue, Kentucky Bluegrass and Perennial Ryegrass Mixture – 88% Avenger, Blackwatch, DaVinci and Inferno (E)* Turf Tall Fescue – 7% BlueChip and Everest Kentucky Bluegrass – 5% Monterey 3 Perennial Ryegrass ***Denotes Endophyte Enhanced**

Characteristics

- Superior ratings from the National Turf Evaluation Program trials
- Extremely wear tolerant once established
- Excellent low growing characteristics
- Superior low maintenance performance
- Good disease resistance
- Adapted to a wide range of turf applications
- Blue Chip and Everest Kentucky Bluegrass provide a better knitted turf

Seeding Information

New Seeding: 10 Lbs per 1,000 Sq. Ft.

Over-seeding: 5 Lbs per 1,000 Sq. Ft.

Over-seeding high Use Areas: 12 Lbs per 1,000 Sq. Ft. at weekly/monthly intervals as needed

Seeding Dates: March – May, August – October

Dormant Seeding: December – March

Uses

A mixture of the very best of the new lower growing (dwarf) turf type tall fescues. Varieties selected score at the very top in the NTEP trials for turf quality, wear tolerance, low maintenance performance, leaf texture, endophyte enhancement and disease resistance, especially brown patch. Blue Chip and Everest Kentucky Bluegrasses are special type bluegrasses, which provides the knitting effect of the Kentucky Bluegrass rhizomes but are non-aggressive and will not compete with the tall fescue. The addition of a small amount of high endophyte perennial ryegrass serves a two-fold purpose. It provides natural insect resistance and acts as a nurse crop to promote establishment of the tall fescue. Can be used in all aspects of the turf industry. Generally recommended for areas where supplemental irrigation can be applied, although Super Turf II will adapt well to low maintenance areas.

This Certified Interagency Blue Tag is your guarantee of variety and superior quality
